BASH SCRIPTING

VARIABLES

- Assignment:

  - `mynum=5`
  - `mycolor=hello`
  - `mylongmsg='hello world'`

- Reading/Accessing Value: precede by $

  - `echo $mynum`

- Spacing is important

SINGLE VS DOUBLE QUOTES

- Single quotes -> everything treated literally
- Double quotes -> expand variables inside

ARITHMETIC EXPANSION

- Can't just do 1+1 or var1+var2
- `$((1+1))`
- `$((num1+num2))`
- Operators available:

  `+, -, *, /, %, ++, --, **`
